

CLIMBING PLANTS	all container	27
Campsis Flamenco		
radicans		8.00
Self clinging with brilliant orange trumpets		
Clematis montana varities	small pink or white flowers in spring	7.50
Orientalis	small yellow bells during summer	7.50
Hedera (Ivy) in variety		6.50
Hop golden		8.00
Hydrangea Petiolaris	self clinging	9.00
Jasmiun nudiflorum	winter flowering yellow jasmin	7.50
Lonicera (Honeysuckle)		7.50
Halliana (E)	yellow scented, vigorous	
periclymenum Belgica,	early Dutch yellow, red markings	
Serotina,	late Dutch yellow, red markings	
Parthenocissus quinquifolia	Virginia Creeper clings with tendrils	7.50
tricuspidata Veitchii	Boston Ivy self clinging	7.50
Passiflora caerulea	blue passion flower	7.50
Pyracantha (Fire Thorn) (E)		3lit 6.00
Fructo Luteo	yellow berries	
Orange Charmer	orange berries	
Red Pillar	red berries	
Solanum Glasnevin	free flowering climber with blue mauve flowers throughout the summer. Related to the potato plant	7.50
jasminoides Album	similar to 'Glasnevin' but with white flowers	7.50
Vitis colgnetiae	strong growing leaves 30cm across scarlet autumn tints	8.00
vinifera Purpurea	young leaves claret red turning purple	8.00
Indoor Grapes		
Black Hamburg	black sweet desert grape, late ripening	
Buckland Sweetwater	white desert grape. Ripens August

brachybotrys	Okayama	violet blue	short trusses
	Alba- 'Shiro Kapitan'	white	short trusses
	'Showa Beni'	magenta pink	short trusses
floribunda	alba – 'Shiro Noda'	white flowers	long trusses
	Black Dragon-'Yae Kokuryu'	dark double blue	flowers
	Black Dragon (single)	'Kokuryu' deep blue	early flowering
	Domino – 'Issai'	Mid-length flowers	of mid blue
	Eranthema	Mid-length	pale blue flowers
	Hocker Edge	Long	pale blue flowers
	Kimono	Striking variety	with well defined blue eye, Mid length trusses
	Lawrence	Pale blue	longish trusses
	Loders purple	deep red purple	mid length
	Macrobotrys	Long	pale lavender trusses
	nana Richens Purple	Deep purple	blue mid trusses
	Peaches and Cream – 'Kuchibeni'	Pale lilac	long trusses
	Purple Snake	Long	deep purple flowers
	Rosea - 'Honbeni'	Long	magenta pink trusses
	Rolvenden Bronze Leaved.	Striking	bronze leaves in the spring
sinensis	alba	Mid length	white flowers
	Amethyst	Deep	violet blue
	Blue Sapphire	Compact	deep blue trusses
	Caroline	compact	trusses of pale blue
	Consequa	Compact	deep blue trusses
Hybrids	x Burford	long	trusses with large individual flowers
	x Formosa	Late	flowering blue form
	x Lavender Lace	Very long	trusses, pale blue

WISTERIA IN ORDER OF FLOWERING - APRIL / MAY**floribunda Kokuryu** (Single Black Dragon)

Normally the first to open. Mid blue, probably **the purest blue** (least red in colour)..Flowers mid length set off against pale lemon leaves that open with the flowers. Unfortunately leaves look as if they have a virus later in summer. The flowers also first to fade. See also fl. Bluebird for purest blue.

sinensis Amethyst

Deep violet blue flowers of mid length. Darker and with more red in colour than Kokuryu or Consequa. The smaller yellow blotch than on most wisteria giving a deeper overall colour. Flowers before leaves open but fades quickly in sunlight.

brachybotrys collected in the wild

Short rounded blooms of violet blue, similar in colour to Amethyst but set off against young bronze foliage. Flowers throughout the spring flowering period, longer than most varieties. Strong distinctive perfume

floribunda Purple Snake

Deep purple mid to long flowers. First of the longer flowered varieties to open. Flowers hang straight down and open before the leaves. Individual pips in the flowers tend not to open out retaining a rounded appearance like small grapes. This characteristic prevents the colour from fading during its long flowering period.

Brachybotrys Shiro Kapitan (Venusta or Alba)

Short rounded blooms of pure white set off against pale green leaves combined with long flowering period. One of the fastest wisteria to come into flower after planting.

sinensis 'Consequa'

Opens before the leaves with mid length blue /purple flowers. This variety deserves its place as one of the best and most commonly planted wisteria. Mature plants will often have a fair number of flowers again in July/August

sinensis Blue Sapphire

Mid to pale blue/purple flowers with large pips and average length. Similar to sinensis Consequa but with less red in the colour.

sinensis Alba

mid length flowers hang straight down coloured white with small yellow eye. Growth is lighter than other sinensis varieties.

floribunda 'Domino' (Issai)

Flowers of midlength and medium blue colour. Pips open to show yellow on a mauve background .

floribunda 'Nana Richens Purple'

Flowers mid to long in length and deep blue in colour. Individual pips do not open very much giving the appearance of deeper colour as the flower ages. A striking feature of this variety is the shiny foliage.

brachybotrys 'Showa Beni

This variety has the best pink colour of any of our varieties. The colour is deeper than floribunda 'Honbeni' (Rosea) although the flowers are shorter and more rounded.

Floribunda Kimono A free flowering variety with white flowers containing a striking blue centre. New introduction by Chris Lane.

X 'Lavender Lace'

30

A variety with long flowers and large pips in the racemes giving the flowers a full appearance. The pips have a yellow white center with darker blue mauve surround

Floribunda Eranthema pale 'Wedgewood Blue' flowers of mid length. This variety rivals fl Kokuryu for being the purest blue.

floribunda 'Kuchibeni ('Peaches and Cream')

Very long racemes with cream and white centres to the flowers surrounded by red purple, giving a distinctive mauve white appearance fading almost to white.

X 'Caroline'

This variety has short compact flowers of mid blue colour

floribunda 'Honbeni' ('Rosea')

Very long flowers of pale magenta pink colour. Similar in appearance to 'Kuchibeni' but with more pink in the colour.

floribunda 'Hocker Edge'

Flowers long in length and hang straight down. Similar to 'Lavender Lace' but open petals are darker.

floribunda Lawrence

Pale blue purple with large pips and long trusses

floribunda Loders Purple

Deep red purple flowers with mid length trusses. The individual pips are on the small side.

floribunda Macrobotrys / 'Multijuga'

Pale mauve variety with the longest flowers. Flowers often over 1m in length that hang in a dainty and attractive manor.

floribunda 'Yae Kokuryu' ('Black Dragon' or 'Violacea Plena')

The only wisteria with double flowers. The long blooms are dark purple in bud opening lavender blue. There is a lot leaf out by the time the flowers open. On our nursery the flower truss does not all open at once with the top of the truss dyeing before the bottom is fully out.

x formosa mid blue and mid length flowers. Green foliage tends to appear with the flowers

Floribunda 'Shiro Noda' ('Alba' or 'Multijuga Alba')

The last of our wisteria to flower. The very long flowers are white and start opening before the leaves. A most variety to be recommended.
