

**TREES AND SHRUBS : O/G open ground****9****C container****ABELIA**

C 5lit 8.50 3lit 7.00

‘Edward Goucher’ small evergreen shrub with glossy green leaves  
lilac pink flowers, summer and autumn.

grandiflora Evergreen shrub with arching branches. Flowers  
July to October pink / white slight fragrance.

‘Francis Mason’ similar to above but slower growing  
and yellow variegated foliage

**ACACIA pravissima** Australian Wattle. A tall growing evergreen tree / shrub with  
small triangular leaves and yellow flowers March. Not fully  
hardy, requires a sheltered site. 3lit 7.00 7.5lit 20.00

**ACER (Maple)**

campestre (Field Maple) small leaved bushy variety suitable for  
inclusion in a mixed hedge or as small specimen C 15.00  
(see also hedging)

capilipies (Snake Bark Maple) small tree with striated bark on  
young growth C 15.00

grisium Paperbark Maple. Good autumn tints, shiny peeling  
bark on old wood C 45.00

platanoides  
Crimson King deep purple/red leaved variety, 6m+ (20'+) O/G 28.00  
with showy yellow flowers in Spring tub 50.00 C 35.00

Drumondii dramatic silver edged leaves 6m+ (20'+) O/G 20.00  
remove occasional reverting shoots C 20.00- 35.00

*Japanese Maples (japonica and palmatum types) make ideal slow growing small  
specimen trees for the garden with attractively shaped leaves which usually colour  
well in the Autumn. They prefer a moist, well drained soil on the acid side, in a  
position that is sheltered from late frosts and Spring winds. Suitable for tub growing.*

**Acer shirasawanum. Aureum** Soft lemon lvs, slow growing, 1.25m (4')  
requires protection from full sun C 18.00

**Acer palmatum**

“ Atropurpureum Purple leaves, turn red in Autumn C 14.00

**AESCULUS hippocastanum** (Horse Chestnut)

*Large spreading showy tree covered in white candle flowers in May followed by fruits containing 'conkers'. Introduced in 17<sup>th</sup> Century.*

Baumannii' similar to above but with double flowers and no fruits.

introduced 1820

C 24.00

carnea Briotii smaller growing variety with red flowers intd 1858

C 24.00

parviflora spreading shrub 2.5m high flowers July-August

7.5lit C 18.00, 17lit C25-00

**ALNUS**

*Alders make well shaped conical trees of 12m(36')+ in height. Quite apart from their suitability in the garden as either a well shaped specimen or a clipped windbreak, Alders have the added interest of being broad leaved, deciduous conifers. During the Winter months red catkins hang amongst clusters of small brown cones. The catkins open in Spring, green cones form during the Summer. Alders make fast growth, even finding wet soils suitable.*

Glutinosa Common Alder

C 20.00

rubra 10-15cm cotkins

17.5lit

C 20.00

**AMELANCHIER canadensis** (Snowy Mespilus)

5lit C 18.00

*Large shrub or small tree, 5 x 3m (15' x 10'). Clouds of small white flowers in Spring. Excellent Autumn colour and small red fruits. Any soil. Does well in moist site.*

Lamar. Balerina

5Lit 16.00 7.5lit 22.00

BEECH (see Fagus and hedging plants)

BERBERIS

C 3lit 7.00

*A very useful family of deciduous and evergreen members in a range of sizes from 0.60-5m (2' to 15'). Tolerant of all soils and conditions, even dry shade from trees. All produce small yellow or orange flowers in the Spring, and some follow with decorative fruits. All have characteristic triple thorns on their stems which need to be respected! May be used for hedging. Prune after flowering.*

sargentiana (E) 3m (8') Dense broad evergreen, with leathery leaves and  
Masses of perfumed spring flowers. Autumn colour

thunbergii

“ Aurea 0.75m(2½') round yellow leaves, semi shaded site

“ Helmond Pillar Upright purple leaved form

verruculosa (E) 1.5m (4') Strongly arched dome of shiny triangular  
leaves assuming red winter tints.

vulgaris Lombarts Purple 2m (6') Deep purple leaves, yellow flws.

More open habit than Atropurpurea so more readily retains purple colour

**BETULA (Birch)** 2lit 7.00 7.5lit 24.00 13lit 30.00 17lit 35.00 35lit 70.00  
O/G 10.00 –50.00

*A family of light graceful trees attaining 8m + (25'). Use for group or specimen planting. Suitable for all soils. They cast light shade themselves and so may be under planted with groups such as Heathers, Rhododendrons and Camellia. Birch are synonymous with white bark, however seedling forms vary in this characteristic. Named varieties have been selected for their superior qualities of habit and bark colouring, A feature of Birch is their yellow gold Autumn appearance.*

albo-sinensis 'Septentrionalis'	mature bark peeling coppery pink, mat green leaves. Introduced. 1908 by E. Wilson
alleghaniensis 'Lutea'	medium sized with shiny creamy white peeling bark. leaves turning a blaze of yellow.
chinensis Conynghan	bark shiny dark brown peeling to pink
ermanii 'Greyswood Hills'	white trunk, orange-brown branches, glossy leaves
grossa 'Hergest'	mature bark pink to orange. Tree compact tulip shaped
nigra 'River birch'	light brown flaky bark spreading habit tolerates wetter soils
mandschurica szchuanica	medium size tree with chalky white bark

**12 TREES AND SHRUBS : O/G open ground C container 12**

Betula	pendula	Shiny shoots, diamond leaves. Tolerates drier soils. Native to UK
	Dalecarlica	Swedish Birch with graceful cut leaves . Gives little shade.
	Fastigiata	upright columnar habit
	Purpurea	purple leaved slower growing
	Tristis	strongly weeping form taller than Youngii
	Youngii	a selected form of strongly weeping habit developing a broad umbrella head 15' tall
	pubescens	native white birch
	papyrifera 'Paper Birch'	larger and faster growing with peeling white bark. Introd. 1750
	utilis Himalayan Birch	orange white peeling bark. Introd. by Sir Joseph Hooker 1849.
	jacquemontii	white peeling bark glossy leaves
	“ ‘Doorenbos’	produces white bark on young tree
	“ ‘Inverleith’	white of trunk contrasts red/brown of younger shoots
	“ ‘Greyswood Ghost’	white bark on trunk and younger shoots
	“ ‘Jermyns’	a vigorous form of jacquemontii
	“ ‘Snow Queen’	tall upright growing with white bark

**BUDDLEIA davidii (Butterfly Bush)**

*. Late Summer flowering. Lovely scented panicles in various shades. Will benefit from hard pruning in Spring to keep their shoots and flowers at appreciable height, cut to two buds of last season's growth, i.e. "stooling" to keep to 2 x 1.8m(6' x 5'). Good for dry sunny position and gives dramatic height to a border and attracts butterflies*

C £8.00

alternifolia	Lilac flowers in June
davidi	Black Knight dark blue purple flowers
	Harlequin purple flowers, cream variegated foliage, smaller lower growing
Lochinch	mauve flowers with orange eye, grey leaves
Pink Delight	best pink form large panicles recent hybrid
Royal Red	bright red purple flowers
White Bouquet	white flowers with yellow eye, large panicles

**BUXUS (E) (Box)**

C p9 2.50, 1lit3.50 o/g 7.00

*Slow growing evergreen suitable for edging and topiary.*

sempervirens	
suffruticosa	miniature variety
variegata	white edged leaves

**CALLISTEMON linearis** narrow leaves spikes of scarlet flowers 3lit 7.00  
7.5lit half std 15.00

**CAMELLIA (E) 2lit 6.00 4 lit C 12.00**

*The glossy leaves are an attractive feature all year round. These shrubs are hardy but to minimise damage to the superb flowers of Feb – April site out of reach of the morning sun. A sheltered North wall is ideal. Camellias require lime free soil and benefit from annual mulching to conserve moisture in the Summer. They associate well with Rhododendrons, Azaleas and Heathers; and make good specimen plants and hedges. They are successful in tubs, preferably watered with collected rain water. The williamsii varieties are self dead heading.*

japonica Alba Simplex	single white
Bob Hope	semi-double deep red
Cornish Snow	double white spreading habit
Joseph Phingstle	double red
Lady Campbell	red double small
Lady Vansittart	white with pink stripes and blotches
Mathotiana Alba	large double white

sasanqua winterflowering white variety

x williamsii

China Clay	semi double white
Debbie	clear pink paeony form
Donation	semi-double shell pink
Inspiration	semi-double pink

**CARPINUS** betulus (Hornbeam) see hedging section

**CATALPA** bignonioides (Indian Bean Tree)

*From eastern U.S.A. low wide spreading domed 6 x 7m (15' x 20') tree with large heart shaped leaves and lovely perfumed panicles of flowers in July, reminiscent of Horse Chestnut. Followed by brown "runner bean" like pods in Autumn. An interesting specimen tree preferring good soil and a sunny position. Our trees are a selected form, grafted to produce flowers from an early age.*

Catalpa b. Aurea beautiful eye catching golden leaved form.

*Responds well to stooling in Spring to gain larger leaves and emphasis as a shrub with strong colour throughout the Summer. 120-150cm (4' x 5') when pruned annually to three buds of last season's growth in May.*

C 3lit 12.00

**CEANOTHUS** ("Californian Lilac) C 3lit 7.00 7.5lit 9.00

*Vigorous shrubs remarkable for their blue flowers and glossy leaves. They require sun, well drained soil and usually protection from a wall or other shrubs. Prune and shape after flowering for early varieties, and in Spring for late varieties.*

Concha (E) deep blue early flowering

Dark Star (E) deep blue flowers small impressed leaves flowers after Concha

thyrsoflorus repens (E) arching habit, mid blue large flws Summer 2m(6') spread
