ABELIA

8.00

7

- ‘Edward Goucher’ small evergreen shrub with glossy green leaves
lilac pink flowers, summer and autumn.
grandiflora Evergreen shrub with arching branches. Flowers
July to October pink / white slight fragrance.
‘Francis Mason’ similar to above but slower growing
and yellow variegated foliage

ACER (Maple)

- campestre (Field Maple) small leaved bushy variety suitable for
inclusion in a mixed hedge or as small specimen C 15.00
(see also hedging)
capilipies (Snake Bark Maple) small tree with striated bark on
young growth C 15.00

Japanese Maples (japonica and palmatum types) make ideal slow growing small specimen trees for the garden with attractively shaped leaves which usually colour well in the Autumn. They prefer a moist, well drained soil on the acid side, in a position that is sheltered from late frosts and Spring winds. Suitable for tub growing.

Acer japonica Aconitifolium small spreading tree with red autumn tints 1.5m 10/yr

Acer palmatum

- “ Atropurpureum Purple leaves, turn red in Autumn C 14.00

BEECH (see Fagus and hedging plants)

BERBERIS C 5lit 10.00

A very useful family of deciduous and evergreen members in a range of sizes from 0.60-5m (2' to 15'). Tolerant of all soils and conditions, even dry shade from trees. All produce small yellow or orange flowers in the Spring, and some follow with decorative fruits. All have characteristic triple thorns on their stems which need to be respected! May be used for hedging. Prune after flowering.

sargentiana (E) 3m (8') Dense broad evergreen, with leathery leaves and

Masses of perfumed spring flowers. Autumn colour

verruculosa (E) 1.5m (4') Strongly arched dome of shiny triangular

leaves assuming red winter tints.

TREES AND SHRUBS : O/G open ground C container

BETULA (Birch) 2lit £7 7.5lit £24 13lit 30.00 35lit £50

O/G 10.00 –50.00

Multistem Jaquonti 30.00

A family of light graceful trees attaining 8m + (25'). Use for group or specimen planting. Suitable for all soils. They cast light shade themselves and so may be under planted with groups such as Heathers, Rhododendrons and Camellia. Birch are synonymous with white bark, however seedling forms vary in this characteristic. Named varieties have been selected for their superior qualities of habit and bark colouring, A feature of Birch is their yellow gold Autumn appearance.

albo-sinensis 'Septentrionalis' mature bark peeling coppery pink, mat green leaves. Introduced. 1908 by E. Wilson
alleghaniensis 'Lutea' medium sized with shiny creamy white peeling bark. leaves turning a blaze of yellow.
chinensis Conynghan bark shiny dark brown peeling to pink

nigra 'River birch' light brown flaky bark spreading habit tolerates wetter soils

Betula pendula Shiny shoots, diamond leaves. Tolerates drier soils. Native to UK
Dalecarlica Swedish Birch with graceful cut leaves. Gives little shade.
Fastigiata upright columnar habit
Purpurea purple leaved slower growing
Tristis strongly weeping form taller than Youngii
Youngii a selected form of strongly weeping habit developing a broad umbrella head 15' tall

jacquemontii white peeling bark glossy leaves
“ 'Doorenbos' produces white bark on young tree
“ 'Greyswood Ghost' white bark on trunk and younger shoots
“ 'Jermyns' a vigorous form of jacquemontii
“ 'Snow Queen' tall upright growing with white bark

BUDDLEIA davidii (Butterfly Bush)

. Late Summer flowering. Lovely scented panicles in various shades. Will benefit from hard pruning in Spring to keep their shoots and flowers at appreciable height, cut to two buds of last season's growth, i.e. "stooling" to keep to 2 x 1.8m(6' x 5'). Good for dry sunny position and gives dramatic height to a border and attracts butterflies

C £8.00

Lochinch mauve flowers with orange eye, grey leaves
Pink Delight best pink form large panicles recent hybrid

BUXUS (E) (Box) C p9 2.00, 1lit3.00 2lit4.00

Slow growing evergreen suitable for edging and topiary.

sempervirens
suffruticosa miniature variety
variegata white edged leaves

CALLISTEMON linearis narrow leaves spikes of scarlet flowers

7.5lit half std 15.00

TREES AND SHRUBS : O/G open ground C container

CAMELLIA (E) 2lit 6.00 4 lit C 12.00

The glossy leaves are an attractive feature all year round. These shrubs are hardy but to minimise damage to the superb flowers of Feb – April site out of reach of the morning sun. A sheltered North wall is ideal. Camellias require lime free soil and benefit from annual mulching to conserve moisture in the Summer. They associate well with Rhododendrons, Azaleas and Heathers; and make good specimen plants and hedges. They are successful in tubs, preferably watered with collected rain water. The williamsii varieties are self dead heading.

japonica Alba Simplex	single white
Lady Campbell	red double small
Lady Vansittart	white with pink stripes and blotches
Mathotiana Alba	large double white
sasanqua Paradise Blush	winter flowering pink/
x williamsii	
China Clay	semi double white
Debbie	clear pink paeony form
Donation	semi-double shell pink
Inspiration	semi-double pink

CARPINUS betulus (Hornbeam) feathered trees 7.5lit 16.00

CATALPA bignonioides (Indian Bean Tree)

From eastern U.S.A. low wide spreading domed 6 x 7m (15' x 20') tree with large heart shaped leaves and lovely perfumed panicles of flowers in July, reminiscent of Horse Chestnut. Followed by brown "runner bean" like pods in Autumn. An interesting specimen tree preferring good soil and a sunny position. Our trees are a selected form, grafted to produce flowers from an early age.

Catalpa b. Aurea beautiful eye catching golden leaved form.

Responds well to stooling in Spring to gain larger leaves and emphasis as a shrub with strong colour throughout the Summer. 120-150cm (4' x 5') when pruned annually to three buds of last season's growth in May.

C 7.5lit 16.00

CEANOTHUS ("Californian Lilac)

C 3lit 8.00

Vigorous shrubs remarkable for their blue flowers and glossy leaves. They require sun, well drained soil and usually protection from a wall or other shrubs. Prune and shape after flowering for early varieties, and in Spring for late varieties.

Concha (E) deep blue early flowering

CERCIS canadensis Forest Pansy Large redish purple leaves C 44.00

Slow growing small tree 4 x 2 (12' x 6'). Purple pea flowers contrast with dark stems May. Dainty heart shaped leaves. Introduced 16th Century.

CHAENOMELES (Japonica) (Flowering Quince)

C 3lit 8.00

Easily grown Spring flowering shrubs, either free standing or wall trained. Also makes a good hedge. Flowers March to May, copes with frost and shade, therefore useful for North and East walls. Edible quinces in Autumn. Hard Winter pruning reveals flowers. Attractive young red tinged leaves Snowwhite, strong growing

Jet trail
Orange trail
Pink Lady
Snow
Texas

TREES AND SHRUBS : O/G open ground C container

CISTUS (E) (Sun Rose)

C 6.00

Quick growing Summer flowering shrubs for dry sunny sites. Tend to be short lived approx. 5 years. Dislike pruning, dead head only.

Ladanifera tall growing white flowers with chocolate base

CLERODENDRUM bungei

3lit (C) 8.00

suckering shrub with large heart shaped leaves, pink flowers followed by metallic blue berries

CORNUS (Dogwood)

C 7.00 Shrub grown

for winter colour of bright red young bark, which is often maintained by hard pruning (stooling) in Spring. 2 x 2m (6' x 6') if stooled. Copes with damp soils.

alba (Red barked Dogwood)

Gauchaltii yellow variegated leaved red dogwood

sanguinea Winter Beauty shoots bright orange yellow in winter

CORYLUS (Hazel) avellana Contorta (Corkscrew Haze C 3lit 10.00 7.5lit 16.00

Amazing spiralled and looped stems contrast well with Spring catkins. Useful for flower arrangers. Summer foliage is not so attractive. Discovered in 1853 in a hedgerow. 3 x 2m(10' x 6')

Contorta twisted stem C 3lit10.00

Maxima Purpurea purple leaved hazel C 3lit10.00

COTINUS coggygria

C 8.00

Royal Purple (Smoke bush)

C 8.00

Attractive round plum red leaves which turn translucent beetroot red in Autumn. Myriad fluffy purple flowers form a "smoky" haze around the shrub in July. Slow to establish but worth persisting with. . 2 x 2m (6' x 6')

COTONEASTER

A varied and useful family of evergreen and deciduous shrubs and small trees. All have white flowers in June followed by single or clusters of red berries in Autumn which are relished by birds. C 3lit 5.00 Std 25.00

conspicuous 'Decorus' (E) low growing free fruiting form suitable for ground cover

'Coral Beauty' (E) Arching habit, 2' x 6' coral single berries C 3lit, C 6.00

dammeri radicans (E) Vigorous, ground hugging. Single red berries C 3lit 6.00

'Horizontalis' deciduous herring bone shaped branches with white flowers

followed by red berries suitable for ground cover or growing up walls 6.00

Hybridus Pendulus(E) Small weeping tree on a 1.2m(4') stem.Makes an attractive feature in the garden, with glossy leaves and masses of flws. and berries C 25.00

CRATAEGUS Flowering May Tree . 5 x 4m (15' x 12') O/G 22.00 C 25.00

laevigata rosea fl plena double pink flowers

Red Cloud single deep red flowers

x lavallei 'Carrierei' oval shiny leaves, good Autumn colour

Orange yellow berries 15' x 12'

prunifolia noticeable round shiny leaves with good autumn colour and berries

CYTISUS battandieri (Pineapple Broom)

C 16.00

Attractive trifoliolate Laburnum type leaves covered in soft down. Perfumed pineapple scented yellow flowers, July. Wall train, or tree in sheltered site

TREES AND SHRUBS : O/G open ground C container

DEUTZIA x hybrida 'Montrose' free flowering rose pink C 6-00

ELAEAGNUS (E) 7.5lit 20.00

Tough, reliable evergreens for Winter, some variegated, good wind resisters suitable for hedging and seaside planting.

x ebbingei 'Limelight' yellow edged grey green leaves silver reverse,

Winter flowers, perfumed of Pinks, fast grower

pungens Maculata gold central variegated holly-like leaves. A tough bright evergreen ideal for the Winter garden. Remove reverted shoots.

ENKIANTHUS campanulatus 5lit 10.00

erect shrub with abundance of small bellshaped pink bronze flowers

ESCALLONIA (E) C 5lit 8.00 3lit 6.00

Iveyi white flowers large glossy green leaves 5lit

Gold Ellen Bright yellow foliage red flowers 3lit

Langleensis Red flowers, tall growing 3lit

EUCALYPTUS gunnii (E) 13 lit 12-00

Hardest form of Australian Gum Tree. Fast growing evergreen tree will retain rounded, blue, juvenile foliage if pruned regularly after frosts in May. Ideal for flower arrangers.

EUONYMOUS europaeus ('Spindle Tree') any soil, good for chalk

'Red Cascade' large bush or small tree noted for its scarlet autumn colour and abundance of red fruits with orange seeds C 9.00

FAGUS sylvatica (Beech)

GRAFTED VARIETIES C 7.5lit 24.00 17lit 30.00

Aspleniifolia (Fern leaf Beech), narrow leaves cut into slender lobes

Dawyck Tall columnar form with green foliage, broadens with age. Originated in Dawyck, Scotland before 1850

Dawyck Gold Columnar form with bright yellow Spring foliage which quietens in Summer

Dawyck Purple Narrow columnar form with purple leaves

Pendula green leaf, spectacular large wide weeping tree

Purple Fountain More upright habit with weeping branches of very shiny purple leaves

Rohanii Compact growing purple cut leafed variety

Tricolour Variegated purple leaf with pink edge

Zlatia Soft yellow leaf

FORSYTHIA

Thin out and cut back old flowering shoots after flowering. C 5.60

x intermedia 'Lynwood Gold' masses of yellow flowers in May
Fiesta form with soft yellow variegated foliage

FREMONTODENDRON Californian Glory C 3lit 8.00

FUCHSIA gracilis C 5.00

TREES AND SHRUBS : O/G open ground C container

GINKGO biloba (Maidenhair Tree) C 20-00
medium sized tree with fan like leaves. Yellow Autumn tints.

GRISELINA littoralis C 2lit 6.00
1.75m (5') attractive smooth leaved evergreen, pale yellow variegation. Requires sheltered position, avoid heavy wet soil. Tolerant of chalk soils and salt winds.

HAMAMELIS (Witch hazel) C 25.00
Renowned for their frost hardy, strap like flowers Dec/Jan with a sharp fragrance. Large shrubs 3m (10'). Prefers humus rich soil.
mollis yellow flowers

HIBISCUS 3lit C 8-00
Late flowering shrub, requires sun. Single open hollyhock like flowers.
Blue Bird bright blue Red Heart white with red centre
Hamabo blush pink with crimson marking Violet Clair double flower violet
Woodbridge deep rose pink

HYDRANGEA
Late Summer/Autumn flower. Humus rich, moisture retentive yet well drained soil preferred. Beware of frost pockets, leave old flowers for Winter protection. Deadheading and pruning in Spring.
C 3lit 6.00

Ayesha Mophead with lilac or pink flowers
macrophylla Hortensia. pink, red, blue, white, mopheaded flowers
petiolaris (Climbing Hydrangea) white lacecap flowers. C 8.00
North or shady wall. Self clinging.
Arborescens
Anabelle Round headed white sterile flowers C 8.00

HYPERICUM C 6.00
Hidcote upright growing, large yellow saucer flowers July/Oct

ILEX Holly
